

“Our own government was advised and aware that there was **no evidence** of a reduction in transmission to back up the mandates. There was wishful thinking... Their own Department of Justice told them not to mandate if transmission was not prevented.” [NZDSOS 14 Aug 23](#) referring to an official information request to the Ministry of Justice in [OIA-99943.pdf](#).

*92 pages of advice from the Ministry of Justice!* Yikes, I've read longer memos from HR on how they have some spanking new policy and a risk assessment to force injections on us all .

You know what's sad? I can just imagine Chippie asking, "Do we have to share [this report](#) ? Can't we just throw it in the trash or paper shredder and end it?"

Exactly, and then some poor staffer has to explain to him, **"No sir, you were just a shitty Minister for Covid-19."**
